DeKalb County Broadband Task Force

We need your help! The DeKalb County Broadband Task Force is working to connect every DeKalb County resident and business to a reliable internet connection. The Task Force is seeking your assistance in collecting real-time data of where we can improve internet service in the community.

This data will allow us to identify the areas of most need and to maximize broadband funding opportunities. Please submit data through the "Speed Test" and challenge the "FCC Broadband Map" to verify coverage at your home or business is correct.

Take the speed test anon your home/business network -

<https://connectingindiana.com/>

Challenge the FCC broadband map -

broadbandmap.fcc.gov/home

We encourage residents and businesses that lack access to reliable high speed broadband service to also apply to the **Indiana Connectivity Program**. The program allows internet service providers to bid on your home/business to assist in the expense of extending broadband to your location. Here is the link to the program – www.in.gov/ocra/broadband/icp/

Support our broadband efforts and scan below to visit our website!
